Pune, Maharashtra

Objective

Computer Science engineering student currently pursuing B-Tech with a strong interest in AI and full stack web development. A quick learner and motivated fresher seeking opportunities to gain industry experience, apply knowledge to real-world projects, and grow with an innovative organization.

Education

Bachelor of Technology in Computer Science

Vishwakarma University, Pune

2023 – 2027

CGPA: 8.3 / 10

Relevant Courses: Data Structures, Object-Oriented Programming, Web Technologies, Operating Systems

Technical Skills

- **Languages:** Java, JavaScript
 - **Web:** HTML, CSS(tailwind), React.js, Node.js
 - **Database:** PostgreSQL
 - **Query Language:** SQL
 - **Soft Skills:** Fluent English, Effective Communication, Team Collaboration, Quick Learner
-

Projects

- **SmartLibrary AI – Frontend Developer**
 - Developed responsive LMS frontend using React (Vite), Tailwind CSS, and React Router.
 - Implemented complete authentication UI flow (Login, Register, OTP verification, Password Reset) integrated with backend APIs.

- Built AI-powered chat interface for book recommendations with real-time API-based response rendering.
 - Managed state, async API calls (Axios/Fetch), and token-based session handling.
 - Collaborated on backend integration and cloud deployment workflows.
- **Retrieval Augmented Generation with LangChain**
 - Implemented RAG model to enhance LLMs with external knowledge retrieval.
 - Worked with semantic search, embeddings, and query optimization.
 - **AI-Powered Document Retrieval System**
 - Built a document search system using IBM Granite and Docling.
 - Applied embedding models and vector databases for efficient retrieval.
-

Certifications

- **Project Management Essentials** – Coursera, 2024
 - **Agile Project Management** – Great Learning, 2024
 - **IBM Skills Network** – RAG with LangChain
 - **IBM Skills Network** – AI-Powered Document Retrieval System
-

Additional Information

- Available for remote or in-office internships
- Open to learning new frameworks and tech stacks quickly
